

Envko Capstone

Mario Azmy, Sean Kelly, John Sablaon & Blake Stauffer

- Founded in 2020 by Nathan Dracobly
- Mission to give people the tools to understand their financial and environmental impact.
- Vision to create a functional mobile application that allows the user to view stock information, real estate information, and their own bank account statistics as CO₂ and dollar amounts.

Where We Started

Goals

- More bank accounts
- Additional dollar value screens to existing and new areas
- Tracking and saving stocks
- Search for and view properties
- Login with Face ID

Challenges

- Understanding code without comments
- API responses
- Daily communication
- React Native framework

What We Learned

- Screen flexibility with different displays
- Data Fetching/Management
- Developing upon an existing app

Our Highlights

Mario:

- Adding more than one bank Institution
- Manage bank account screen
- Investing search screen
- UI fixes

John:

- Implemented watch list system
- Added ability to manage watch lists
- Implemented bottom bar navigation
- Bug fixes

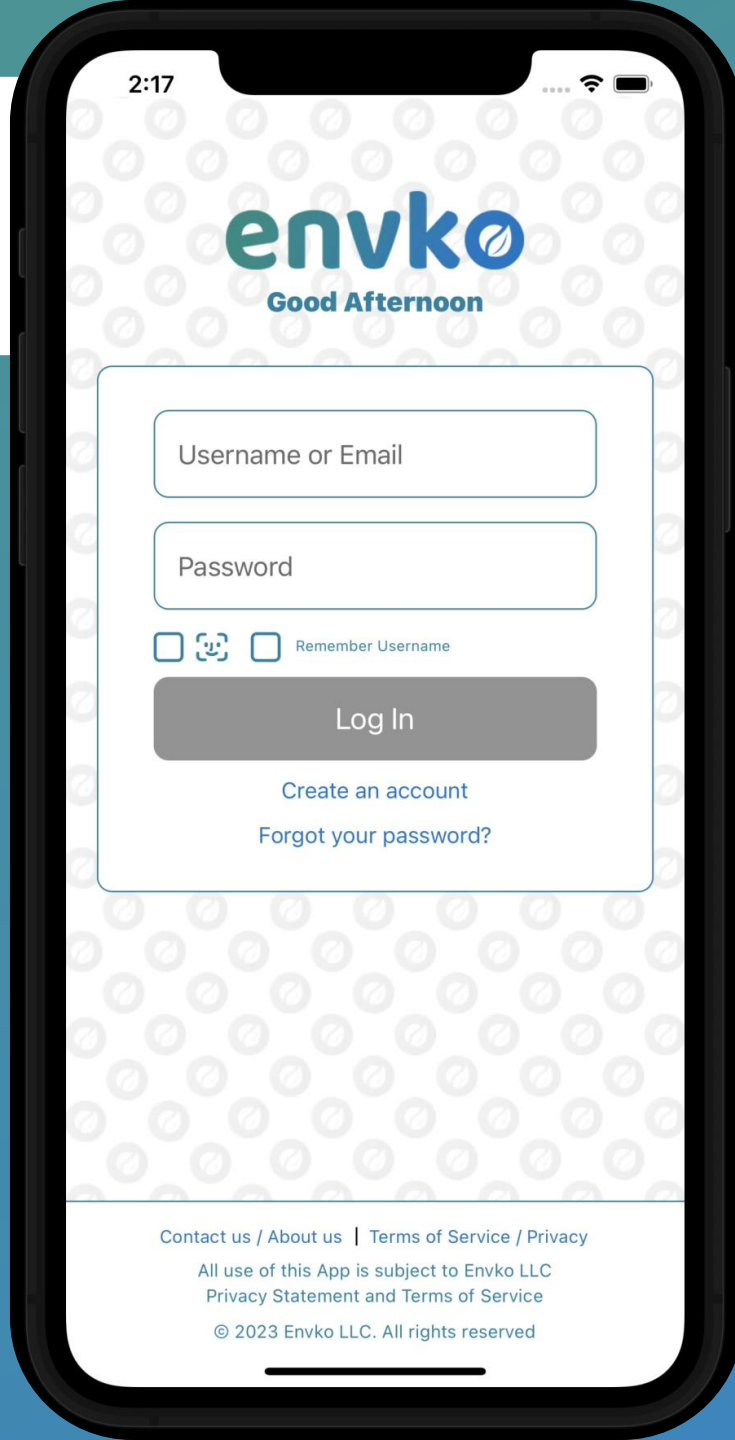

Blake:

- Conversion switch (kg/lb)
- Face-ID and remember username
- Bank spending screen
- UI and bug fixes

Sean:

- Created the profile screen
- Implemented real estate
- Saving system that reduces server calls
- Viewing of stock and co2 info
- Ability to change country codes
